

It Is Most Important To Have A Solid, Flat and Level Foundation For Your Gazebo
Carefully Consider the Recommendations Listed below Prior to Choosing Your Ideal foundation

Indicate the Location Of Your Gazebo Foundation By Doing the Following:

1. Cut 8 Pieces Of 1 x 4 Boards at a 22.5° Angle
Each Should Be the Length of Dimension A
(Shown Below) At Their Longest Point.
2. Place the Boards Around the Perimeter Of the Site to Be Prepared For Your Gazebo.
Verify That The Boards Are Positioned In a Octagon Shape by Using Dimension C And B
3. Spray Paint Along the outside Of the Boards to Indicate the Precise Location of Your Foundation And Then Remove The Boards

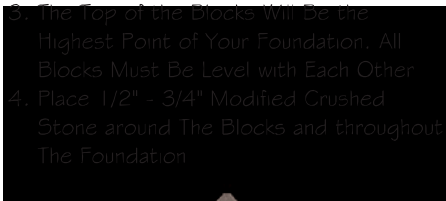

Lancaster County Barns is not responsible for site preparation the property owner is responsible for permits if any are required

The following are 3 common foundations

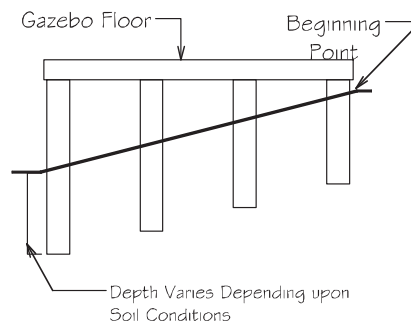

CRUSHED STONE

1. Dig Out 3" - 6" Of Ground
2. Plant Concrete Blocks at Each Octagon Point and in the Center (9 Blocks Total)
3. The Top of the Blocks Will Be the Highest Point of Your Foundation. All Blocks Must Be Level with Each Other
4. Place 1/2" - 3/4" Modified Crushed Stone around the Blocks and throughout The Foundation

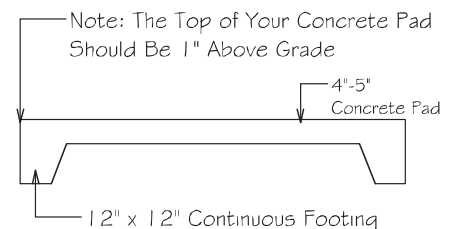

CONCRETE PYLONS

1. Dig 12" Diameter Holes at Each Octagon Point and in the Center (9 Holes Total)
2. Beginning at the Grounds Highest Point Plant a 12" Diameter Quick Form Tube
3. Securely Plant the Remainder of the Tubes Making Sure the Top of Each Is Level with The Top of the First Tube That You Planted In the Ground.
4. Use Rebar As Needed.
5. Fill Each Tube with Concrete And Allow It To Cure Before Placing Your Gazebo Deck
6. Use Metal L. Brackets To Secure The Gazebo Deck To the Pylons

CONCRETE PAD

1. Dig Out 4" - 5" Of Ground So It Is Level all through Its Lowest Point
2. Temporarily Plant Wood Forms Around Perimeter of Your Gazebo Foundation Area
3. Dig a 12" x 12" Continuous Footing Around the Perimeter of the Pad.
4. Use Rebar As Needed.
5. Pour Concrete throughout the Base Making Sure All Points of the Top Are Level
